ABSTRACT

Information Technology Department - Creation of Tamil Nadu Geographical Information System at a cost of Rs.132.80 Lakhs under Phase I - Administrative Approval - Orders - Issued.

Information Technology (e-Gov.) Department

G.O.Ms. No.2

Dated: 24.01.2014

விஜய, ஞை-11

திருவள்ளூர் ஆண்டு-2045

Read:

From the Chief Executive Officer, Tamil Nadu e-Governance Agency Letter No.70/TNCOA/2009, dt.11.6.2013.

ORDER:

The Hon'ble Chief Minister has made the following announcement on 3.5.2013 on the floor of the Tamil Nadu Legislative Assembly under Rule-110 of the Tamil Nadu Legislative Assembly:

"அரசின் பல்வேறு துறைகளில், துறை சார்ந்த முடிவுகளை எடுப்பதற்காக இடம் சார், அதாவது Spatial மற்றும் இடம் சாராத, அதாவது Non Spatial தரவுகளை கிராக இணைக்கும் புவி சார் தகவல்கள், அதாவது Geographical Information மிகவும் அவசியமானதாகும். இதனை நிறைவு செய்யும் வகையில், 6 கோடி ரூபாய் மதிப்பீட்டில் புவி சார் தகவல்களைக் கொண்ட ஒரு பொதுவான மின்னணு வரைபடக் களப்பக தளம் உருவாக்கப்படும். இந்த மின்னணு வரைபடக் களப்பகத் தளத்திலிருந்து தேவையான வரைபடங்களை, தேவையப்படுகின்ற துறைகள் பதிவிறக்கம் செய்து உபயோகிக்க, அனுமதி வழங்கப்படும். இதன் மூலம் அரசு துறைகளுக்கு மின்னணு வரைபடங்கள் கையளக்க கிடைப்பதோடு அல்லாமல் தொழில்நுட்ப பக்கமடையும் கிடைக்கும்."

2. Based on the above announcement, the Chief Executive Officer, Tamil Nadu e-Governance Agency has sent a detailed proposal for creation of a Geographical Information System at an estimated cost of Rs.567.52 Lakhs in the letter read above,

3. The Chief Executive Officer, Tamil Nadu e-Governance Agency in his proposal has stated that the Government of Tamil Nadu has initiated various projects to exploit the opportunities available through Geographic Information System Technology. As a result, a vast volume of spatial data sets has been generated by several departments and agencies - Agricultural Engineering Department (AED), Tamil Nadu Water Supply and Drainage Board, Forest Department, Institute of Water Studies (IWS), Institute of Remote Sensing, National Informatics Centre etc. However, there is no convergence among these departments' efforts.

..2

There is an urgent necessity to bring about a point of convergence for Geographical Information System users through a focused development environment and avoid disorientation and wastage of resources. It is thus felt that a common platform for Tamil Nadu State Spatial Data Infrastructure (TNSSDI) be established in the name of Tamil Nadu Geographical Information 'System' and a Tamil Nadu Geographical Information System policy' in consonance with all the stake holder Departments be evolved.

Scope of Tamil Nadu State Spatial Data Infrastructure (TNSSDI):

- Scale - 1:50,000 to start with, Datum - World Geodetic System 84. (WGS 84), Projection - Traverse Mercator(TM) standards have been proposed by the Core Committee.
- Identification and Classification of layers and segregation of layers for public domain and closed domain including authentication mechanism.
- Sharing of the base layers procured from Survey of India to collate and consolidate layers from various Departments at appropriate scales and to study the requirements and appropriate integration, etc through enabling Government Orders.
- Integration of datasets including those related to Population Census, Agriculture, Public Health, Rural Development, Economics and Statistic etc.
- To build necessary infrastructure for proper access and usage of Geographical Information System across various Departments.
- Standards based Web Geographical Information System will be adopted as the technology to provide interface for the various datasets, keeping in mind the large numbers of users who would show interest to view the same.
- Managing Tamil Nadu Geographical Information System will be a continuous process as the needs would keep growing horizontally and vertically. Sensitisation and training programs should ensure that the number of Geographical Information System users is on the increase.

(12)

-3-

- The Development and deployment of Geographical Information System depends on the degree of involvement of the nodal agencies, coordination among the teams proposed to be set up and timely availability of funds etc.

4. The Chief Executive Officer, Tamil Nadu e-Governance Agency has intended to deploy the application in two phases:-

Phase I Spatial Data procured from Survey of India should be made sharable through enabling Government Orders. This data needs to be corrected for the current administrative setup; consolidating the efforts already put in by the nodal departments by pooling all the other available layers, establishing the necessary structure and framework at the first stage. A tentative timeline is fixed as 1 year for completing this exercise.

Phase II : Augmenting the efforts made in the 1st phase, the Geographical Information System would enhance its repository with other department specific applications. Additional layers for various departments and spatial layers at larger scales for urban applications could be made.

- The spatial data sets of different applications proposed to be developed will initially use the Survey of India base maps at 1:50,000 scale as the reference for the entire State.
- The project estimate does not include any survey related work.
- The estimate for phase I & II does not include large scale mapping activities or procurement of satellite imageries, etc. The cost could depend on requirements in terms of spatial data (scale and resolution), hardware and usage of the present datasets.
- The handholding support meant for districts shall work in coordination with the State Tamil Nadu Geographical Information System technical team.
- It is expected that during the first phase, there would be requirements for Orientation/Awareness/ Workshops on data preparation (spatial and non spatial) for the departments, awareness among user departments (who are not using Geographical Information System currently), capacity building on Open Source tools, etc. and to impart Train the Trainers' Programs during end of Phase I and beginning of Phase II in districts, so that the trained personnel could impart further training to more number of officials from their respective departments. Training Programme could be conducted at Chennai as well as in some of the District Headquarters depending on the requirement.

-4-

5. After careful examination of the proposal sent by the Chief Executive Officer, Tamil Nadu e-Governance Agency, the Government accord administrative approval for creation of an integrated Tamil Nadu Geographical Information System (TNGIS) at an total estimated cost of Rs.1,32,80,000/- (Rupees One Crore thirty two lakhs and eighty thousand only) towards Capital Expenditure under Phase I as detailed below:-

Sl. No.	Item of Expenditure	Component	Amount Sanctioned (Rs. in lakhs)	Remarks
1	Software	Licenses & Upgradation	45.00	
2	Application Security Audit	Include VAPT, Functional and performance Testing	5.00	
3	Infrastructure Cost	Desktop, Laptop, Laser Printer, Scanner, UPS, Misc.	6.80	6 Desktop @ Rs.40,000/- 2 Laptop @ Rs.50,000/- 1 Printer @ Rs.25,000/- 1 Scanner @ Rs.15,000/- UPS 5KVA @ Rs.3,00,000/- Miscellaneous exp. NIL
4	Manpower cost for Application Development		66.00	Project Manager @ Rs.1,00,000/- Developers @ Rs.30,000/- Programmers @ Rs.35,000/- Assistant Programmers @ Rs.20,000/- Consultant/AM @ Rs.75,000/-
5	Training	Orientation/Awareness/Workshop/Train the Trainers & Training	10.00	
Capital Expenditure Total = 132.80 (Rupees One Crore thirty two lakhs and eighty thousand only)				

(15)

-5-

The Geographical Information System project will be taken up under two phases. Under Phase-I the headquarters level implementation will be initiated first and the District level will be strengthened under Phase II.

6. The Chief Executive Officer, Tamil Nadu e-Governance Agency is directed to send necessary proposal for according financial sanction for the project.

7. This order issues with the concurrence of the Finance (Industries) Department vide its U.O.No.1617/Finance(Industries)/2014, dated 23.01.2014.

(BY ORDER OF THE GOVERNOR)

T.K.RAMACHANDRAN,
SECRETARY TO GOVERNMENT
